101 meters

- TO OPTIMIZE THE COST AND MANUFACTURE OF MORE THAN 10,000 STAINLESS STEEL CASTINGS WITH COMPLEX GEOMETRY

The Pascal Towers were built in 1983 and are up to 95 meters high.

2017, is the beginning of the modernization project, which will see the fusion of these two towers, bringing the total height to 101 meters.

The building is enveloped in a remarkable architectural facade and changes its name to : Landscape Towers
